CITY CLERK

There are several things going on along that stretch of Maple Ave. Joink, Vectren and our WWTP have been doing work up there. There was a broken sewer main that has been repaired. Vectren installed a new main and through fits and starts, that work and the patching is completed. Joink's work has also been completed.

Most recently Vectren has installed service gas lines from the main to their customer's buildings. This is the only work, as far as we know, that remains. As an aside, we have told Vectren that we will not be issuing any new ROW permits until their current work in completed. They are under the gun to get their work completed before the asphalt plant shuts down for the winter.(~Dec. 8.)

Let me know if you have any more questions.

Chuck

What is the status on the sidewalks along Maple avenue from 19th to 13th street. Joink and another utility had done some work there and damaged sidewalks along that area. I did not know if they were responsible for the repairs or if they reimbursed us for the repairs? Currently there are about 2 dozen spots that are filled with white rock that had sidewalks there previously. I know weather is gonna be a factor now in repairs. Can you give me an explanation of who is responsible for repairs and when they will be done.

Thanks
Karrum
